

GYP SUM HILL CEMETERY COMPUTERIZED DIRECTORY

A computerized directory has been installed at the Gypsum Hill Cemetery. It is located outside in a small gazebo just north of the cemetery office and is available to the public whenever the cemetery is open, which is 5:00 a.m. to 12:00 midnight. This easy to use touch screen computer allows a person to look up anyone that is buried in the cemetery at their convenience. Information provided includes date of birth, date of death, interment and location of grave. Cemetery maps are also provided to take with the user to better locate the actual grave site. In the future landscaping will be added to enhance the area around the gazebo. This same information is also accessible through this website by using the search feature in the Genealogical Research link.
